

Electric Counterbalanced Trucks 7,500 to 10,000 lb. Capacity

E35P/600H, E40P/600H, E40P/600HL,
E45P/600H, E45P/600HL, E50PHL

SERIES 388

Safety

Excellent visibility of load and through the mast is a key element of forklift safety. This is accomplished via slim (narrow and deep) mast rails, made possible by the unique Linde top mounted tilt cylinders. This feature also allows for excellent mast stability due to a higher mounting point than conventional designs. The automatic brake system ensures immediate stopping anytime the driver leaves the seat.

Performance

Powerful dual drive motors allow fast travel speeds, but even more important, fast acceleration. The operational performance combined with unmatched lifting speeds; enable this truck series to operate in place of engine powered units. This unique drive motor arrangement lets the trucks negotiate railroad crossings, curbs, ramps or other obstacles with ease. High performance auxiliary hydraulic circuits make it possible to achieve peak productivity with even the most demanding attachments.

Operator Comfort

Consistent high levels of performance and efficiency, for extended periods of time, are only possible if the operator feels at ease with the machine. The ergonomic layout of all controls, adjustability of armrest and seat, Linde Load Control system and a "floating" cab provide the best possible operating environment and intuitive interface between truck and operator.

Linde Material Handling

The Linde logo is displayed in white cursive script on a red background. The background of the entire section is a red-to-white gradient with a grid pattern of squares.

Reliability

Reliability and durability are a Linde design objective. All components and assemblies are tested to meet rigorous longevity standards. During truck operation, dual electronic control circuits monitor all systems to ensure flawless performance. Sealed component housings and enclosures provide additional protection against the ingress of contaminants, abrasives and moisture.

Productivity

Effective and efficient, the unique Linde energy management system ensures optimal performance and unmatched energy utilization. Uptime is achieved through the use of highly reliable components, a superb level of comfort for the driver and robust truck design features.

Standard and optional equipment

Standard Equipment

Hydrostatic power steering

Linde dual pedal travel control

Individual hydraulic control levers integrated into the adjustable armrest

80 Volt electrical system

2 x 12 HP, high performance, maintenance free, AC drive motors

29.5 HP, high performance, maintenance free, AC hydraulic motor

Display of battery operating time in minutes

Automatic parking brake

Linde dual motor drive

Proportional reduction of travel speed when cornering (Linde Drive Assistant)

Full suspension, adjustable, PVC operator's seat with armrest

Comprehensive digital instrument display

Generous storage space for writing materials and miscellaneous items

SE tires

Optional Equipment

Single pedal travel control

Additional simple and triple; masts and carriages

Hang-on sideshifter

Various standard and special fork sizes

Integrated sideshifter

Additional hydraulic functions

Tilt memory

Variety of operator cabs

Tire options; SE, radial

Cab heater, defroster

Additional lighting

Backup alarm

Mirrors

Custom speed settings

Other options available on request

Technical data

December 2011 SERIES 388 (E35P/600H)

Characteristics	1.1	Manufacturer				Linde

Features

Linde compact drive axle

- Dual motor drive design with high performance Linde AC technology
- Optimum energy efficiency
- Maintenance-free oil-bath service brake
- Automatic parking brake
- Electronic components located in sealed enclosure for complete protection

Linde hydrostatic power steering

- Minimal physical demands on the operator
- Compact ergonomically designed steering wheel

Linde dual pedal travel control

- Smooth, rapid directional change without repositioning the feet
- Short pedal stroke
- Increased productivity and performance

Linde Load Control (LLC)

- Individual control levers integrated in an adjustable armrest
- Precise and effortless operation of all mast functions
- Safe and highly efficient load handling

Linde dual motor drive

- Two powerful AC drive motors integrated in the front axle
- Smooth acceleration and variable torque characteristics
- Extremely quiet in operation

Linde operator compartment

- Ergonomically designed for efficient, low fatigue operation
- Spacious operator compartment with generous foot room
- Cushioned comfort — floating cab

Linde clearview mast design

- Top mounted tilt cylinders for smooth load control and stability
- Excellent view of load and surroundings
- High residual capacities in all applications

Linde energy management

- Optimized energy consumption
- Accurate battery condition indicator
- Simple battery changing options

Linde Material Handling

ANSI: Standard truck meets all applicable mandatory requirements of ANSI/ITSDF B56.1 standards for powered industrial trucks.
NOTE: Performance data may vary due to motor and system efficiency tolerances. The performance depicted represents nominal values obtained under typical operating conditions. Metric dimensions are in millimeters unless otherwise specified. All metric dimensions are not direct equivalents due to rounding data. The descriptions and specifications included on this data sheet were in effect at the time of printing. Linde Material Handling North America Corporation reserves the right to make improvements and changes in specification or design without notice and without incurring obligation. Please check with your authorized Linde dealer for information on possible updates or revisions.
